

XPERTVU analytics

Domain Specific Dashboards

Dashboards are available for OTT and managed video, broadband, Wi-Fi, IOT and more. Condensed focus highlights the most important measures.

Straightforward Data Discovery

Data discovery can be performed easily by all levels of technical ability. Business leaders have access to data continuously and are empowered to explore and investigate KPIs with ease.

Sophisticated Data Mining

Leverage the power of advanced statistics and rich visualization capability to find anomalies within your data. Easily trend past experience and forecast future performance.

Insights and Sharing

Dashboard delivery, data export and visualizations can be shared across users in a variety of ways. Share via email or export as PDF, JPG, PNG, CSV. Sharing links to reports ensures data integrity and consistency in messaging.

Extensive Data Source Support

Data can be accessed from a large variety of sources - data lakes such as Hadoop, databases and local files allowing for greater flexibility to combine data into one platform.

Scheduled Updates

Data is kept current with scheduled updates - no need for manual intervention.

Empowering leaders with insights needed to maximize customer experience and operational efficiency

XpertVu Analytics leverages Mariner xVu's domain knowledge to focus your valuable time on the most important aspects of your business. Our solution delivers insights and highlights deviations from the expected performance, so that you can make informed decisions for your business and your customers.

XpertVu Analytics is an enterprise-grade platform making data, trends, and alerting available to you directly without the need to rely on others to build reports. It is flexible, easy-to-use, and has deep capabilities to support all levels of technical expertise.
